Here are seven-steps for an effective problem-solving process. 1. Identify the issues. Be clear about what the problem is. Remember that different people might have different views of what the issues are. Separate the listing of issues from the identification of interests (that's the next step!). 2. Understand everyone's interests.

Seven Steps for Effective Problem Solving in the Workplace

3. Focus on Selling the Solution, not Products. A product or service sale results from solving a problem. Whether it be a person or a company, you don't buy the bottle of vitamin water because you like the colour. You purchase it as a means to quench your thirst. The drink is a solution to being thirsty. 4. Highlight Your Differences

5 Steps to Selling the Solution, Not Just the Product

Important: There may be two times during the 3x3 solve that additional steps are needed to solve the 4x4. These two cases are referred to as parities and can only be found in the 4x4 Solution. The parity fixes are in steps 4 and 7 of this guide.

...

Solution Guide. In this solving method we are using the classic FRU Rubik's Cube notation but in this case the letters mark the corners instead of the faces. We assign the letter F, R, L, B, U to the corners of the cube as seen on the image. A letter by itself means a clockwise ↻ rotation and an apostrophe marks a anticlockwise ↺ turn.
