A family life span or cycle includes a number of transition points, which may interact with a young person's developmental trajectory. 2. De-idealisation of parents occurs during adolescence, which may lead to conflict. 3. Changes in long-held roles will occur for both parents and adolescents, and parents are often under-prepared for such ...

Family Development and Transition Points - Strong Bonds ...

Life transition is a general psychological term that is an expansion on the original idea of the mid-life crisis or transition that many people undergo in their early 40s. It is an attempt to chart the major changes in a person's life as they grow, such as from childhood to adulthood, from school to work, and from single life to married life.

What Is a Life Transition? (with pictures)

Transitions Throughout the Life Span offers an engaging look at human development across the life span, paying particular attention to the biological, cognitive, and psychosocial processes that people experience as they adapt to life circumstances.
